OUR SERVICE

Technical Consulting

Researchers in AMPLET Communication Laboratory, who hold a Ph.D. degree in electronics engineering, provide specialized technical consulting in the field of wireless communication technologies.

Training & Seminars

To enhance the professional growth of your engineering team and staff members, we provide in-house training sessions and seminars that are customized to your unique requirements.

MANAGEMENT POLICY

Since the AMPLET's establishment, we have not received any capital from other companies, and continues to operate debt-free with our own funds.

President (Founder)

Dr. Hideyuki Nebiya

Entrepreneur of the Year 2003 (EOY Japan)

AMATEUR RADIO CLUBS JH1YTU / JR6YUH

We are fostering young talent with an interest in science by providing local children with opportunities to experience amateur radio communication. We also conduct disaster preparedness and communications drills to ensure reliable communication in the immediate aftermath of a disaster.
